JOURNAL OF ELECTRON SPECTROSCOPY and Related Phenomena

Subject index

Absolute partial photoionization
Redetermination of absolute partial photoionization cross sections of He and Ne atoms between 20 and 300 eV photon energy 205
Acetylene
Photoionization of acetylene near the threshold 93
Adsorbate–substrate interface
The extra-atomic relaxation and energy relations on the adsorbate–substrate interface 233
AES
A new powerful transformation for maximum likelihood common factor analysis (MLCFA) 225
A system for the intensity calibration of electron spectrometers 191
Electron spectroscopic study of the interaction of oxygen with Co(11$\bar{2}$0) and of coadsorption with water 107
Growth of Te thin films deposited at room temperature on the Si(100)2 × 1 surface 39
Alloy
Surface segregation of PdRh, PdNi and PdCo alloys 79
Anderson model
Theory of many-body effects in valence, core-level and isochromat spectroscopies along the 3d transition metal series of oxides 117
ARPES
Resonant photoemission versus incoherent superposition of Auger and photoemission signals 73
Auger
Resonant photoemission versus incoherent superposition of Auger and photoemission signals 73
Autoionization
Photoionization of acetylene near the threshold 93

BIS
Theory of many-body effects in valence, core-level and isochromat spectroscopies along the 3d transition metal series of oxides 117

Calibration
A system for the intensity calibration of electron spectrometers 191
Ce $M_{4,5}$ edge
Soft X-ray adsorption spectroscopy in transmission mode: Ce $M_{4,5}$ edges 31
Cluster model
Effects of configuration-dependent hybridization on core-level photoemission spectra R1
Cobalt oxide
The state of the oxygen at the surface of polycrystalline cobalt oxide 61
Configuration
Effects of configuration-dependent hybridization on core-level photoemission spectra R1
Constraint-induced bias
The use of least squares for XPS peak parameters estimation. Part 3. Multicollinearity, ill-conditioning and constraint-induced bias 179
Coster–Kronig
Decay of the resonantly excited states of atomic Xe 25
The X-ray photoemission spectra of $Nd(OH)_3$, $Sm(OH)_3$, $Eu(OH)_3$ and $Gd(OH)_3$ 1
Co(11$\bar{2}$0)
Electron spectroscopic study of the interaction of oxygen with Co(11$\bar{2}$0) and of coadsorption with water 107
CPES
Photoionization of acetylene near the threshold 93
CS_2
Sulfur 2p ionization energies of H_2S, OCS, SO_2, and CS_2 21

DTA
The state of the oxygen at the surface of polycrystalline cobalt oxide 61

ESCA
Comments on "Determination of numerical data from polychromatic ESCA spectra and their verification" 263
Reply to the Comment by G. Leclerc and J.J. Pireaux 267
Extra-atomic relaxation
The extra-atomic relaxation and energy relations on the adsorbate–substrate interface 233

Factor analysis
The state of the oxygen at the surface of polycrystalline cobalt oxide 61
Factor Soft
A new powerful transformation for maximum likelihood common factor analysis (MLCFA) 225
Fit quality
Reply to the Comment by G. Leclerc and J.J. Pireaux 267
Fluorescence yield
Soft X-ray absorption spectroscopy in transmission mode: Ce $M_{4,5}$ edges 31
Focussing
Verification of focusing properties of the multicascade electrostatic analyzer 87
FY
Soft X-ray absorption spectroscopy in transmission mode: Ce $M_{4,5}$ edges 31

Green's function
Decay of the resonantly excited states of atomic Xe 25

H_2S
Sulfur 2p ionization energies of H_2S, OCS, SO_2, and CS_2 21
Helium
Redetermination of absolute partial photoionization cross sections of He and Ne atoms between 20 and 300 eV photon energy 205
Hybridization
Effects of configuration-dependent hybridization on core-level photoemission spectra R1

Ill-conditioning
The use of least squares for XPS peak parameters estimation. Part 1. Myths and realities 141
The use of least squares for XPS peak parameters estimation. Part 3. Multicollinearity, ill-conditioning and constraint-induced bias 179
Incoherent superposition
Resonant photoemission versus incoherent superposition of Auger and photoemission signals 73
Ionization energy
Sulfur 2p ionization energies of H_2S, OCS, SO_2, and CS_2 21

LEED
The extra-atomic relaxation and energy relations on the adsorbate–substrate interface 233
Least squares
The use of least squares for XPS peak parameters estimation. Part 1. Myths and realities 141
The use of least squares for XPS peak parameters estimation. Part 2. Univariate hypothesis testing 165
The use of least squares for XPS peak parameters estimation. Part 3. Multicollinearity, ill-conditioning and constraint-induced bias 179
LMTO
Theory of many-body effects in valence, core-level and isochromat spectroscopies along the 3d transition metal series of oxides 117

MLCFA
A new powerful transformation for maximum likelihood common factor analysis (MLCFA) 225
Model
Surface segregation of PdRh, PdNi and PdCo alloys 79
MRT
A new powerful transformation for maximum likelihood common factor analysis (MLCFA) 225
Multicascade electrostatic analyser
Verification of focusing properties of the multicascade electrostatic analyzer 87

Neon
Redetermination of absolute partial photoionization cross sections of He and Ne atoms between 20 and 300 eV photon energy 205
Nickel oxide
Ultrathin nickel oxide on the V_2O_3/Cu(100) surface studied by XPS 51
Nitrogen
An XPS study of nitrogen–sulfur compounds 47

OCS
Sulfur 2p ionization energies of H_2S, OCS, SO_2, and CS_2 21
Oxygen
Electron spectroscopic study of the interaction of oxygen with Co($11\bar{2}0$) and of coadsorption with water 107

PAX
The extra-atomic relaxation and energy relations on the adsorbate–substrate interface 233
Palladium alloy
Surface segregation of PdRh, PdNi and PdCo alloys 79
Paramagnetism
Surface segregation of PdRh, PdNi and PdCo alloys 79
PES
Redetermination of absolute partial photoionization cross sections of He and Ne atoms between 20 and 300 eV photon energy 205

Resonant photoemission versus incoherent superposition of Auger and photoemission signals 73
Polycrystalline
The state of the oxygen at the surface of polycrystalline cobalt oxide 61

Regression
The use of least squares for XPS peak parameters estimation. Part 1. Myths and realities 141
The use of least squares for XPS peak parameters estimation. Part 2. Univariate hypothesis testing 165
The use of least squares for XPS peak parameters estimation. Part 3. Multicollinearity, ill-conditioning and constraint-induced bias 179
Relaxation
Decay of the resonantly excited states of atomic Xe 25
Reproducibility
A system for the intensity calibration of electron spectrometers 191
Residuals analysis
Comments on "Determination of numerical data from polychromatic ESCA spectra and their verification" 263
Reply to the Comment by G. Leclerc and J.J. Pireaux 267
Resolution
Verification of focusing properties of the multicascade electrostatic analyzer 87
Resonant excitation energy
Decay of the resonantly excited states of atomic Xe 25
Resonant photoemission
Resonant photoemission versus incoherent superposition of Auger and photoemission signals 73

S2p ionization energy
Sulfur 2p ionization energies of H_2S, OCS, SO_2, and CS_2 21
Silicon
Growth of Te thin films deposited at room temperature on the Si(100)2 × 1 surface 39
Si(100)2 × 1
Growth of Te thin films deposited at room temperature on the Si(100)2 × 1 surface 39
SO_2
Sulfur 2p ionization energies of H_2S, OCS, SO_2, and CS_2 21
Software
The use of least squares for XPS peak parameters estimation. Part 1. Myths and realities 141
Spectrometer
A system for the intensity calibration of electron spectrometers 191
Sulphur
An XPS study of nitrogen–sulfur compounds 47
Super–Coster–Kronig
Decay of the resonantly excited states of atomic Xe 25
Superexcited state
Photoionization of acetylene near the threshold 93
Surface segregation
Surface segregation of PdRh, PdNi and PdCo alloys 79

TEY
Soft X-ray absorption spectroscopy in transmission mode: Ce $M_{4,5}$ edges 31
TG
The state of the oxygen at the surface of polycrystalline cobalt oxide 61
Thin film
Growth of Te thin films deposited at room temperature on the Si(100)2 × 1 surface 39
Threshold
Photoionization of acetylene near the threshold 93
$TiO_2 3d_0$
Theory of many-body effects in valence, core-level and isochromat spectroscopies along the 3d transition metal series of oxides 117
Total electron yield
Soft X-ray absorption spectroscopy in transmission mode: Ce $M_{4,5}$ edges 31
TPES
Photoionization of acetylene near the threshold 93
Trihydroxide
The X-ray photoemission spectra of $Nd(OH)_3$, $Sm(OH)_3$, $Eu(OH)_3$ and $Gd(OH)_3$ 1

Ultrathin film
Ultrathin nickel oxide on the V_2O_3/Cu(100) surface studied by XPS 51
Univariate hypothesis test
The use of least squares for XPS peak parameters estimation. Part 2. Univariate hypothesis testing 165
UPS
Electron spectroscopic study of the interaction of oxygen with Co(11$\bar{2}$0) and of coadsorption with water 107
The use of least squares for XPS peak parameters estimation. Part 3. Mulicollinearity, ill-conditioning and constraint-induced bias

V_2O_3/Cu(100)
Ultrathin nickel oxide on the V_2O_3/Cu(100) surface studied by XPS 51
Vanadium oxide
XPS studies of V_2O_5, V_6O_{13}, VO_2 and V_2O_3 249

Variance
Comments on "Determination of numerical data from polychromatic ESCA spectra and their verification" 263
Reply to the Comment by G. Leclerc and J.J. Pireaux 267

Work function
Electron spectroscopic study of the interaction of oxygen with Co(11$\bar{2}$0) and of coadsorption with water 107

XAS
Soft X-ray absorption spectroscopy in transmission mode: Ce $M_{4,5}$ edges 31
Theory of many-body effects in valence, core-level and isochromat spectroscopies along the 3d transition metal series of oxides 117
Xenon
Decay of the resonantly excited states of atomic Xe 25
XPS
The use of least squares for XPS peak parameters estimation. Part 3. Multicollinearity, ill-conditioning and constraint-induced bias 179
A system for the intensity calibration of electron spectrometers 191
An XPS study of nitrogen–sulfur compounds 47
Effects of configuration-dependent hybridization on core-level photoemission spectra R1
Electron spectroscopic study of the interaction of oxygen with Co(11$\bar{2}$0) and of coadsorption with water 107
Growth of Te thin films deposited at room temperature on the Si(100)2 × 1 surface 39
Surface segregation of PdRh, PdNi and PdCo alloys 79
The state of the oxygen at the surface of polycrystalline cobalt oxide 61
The use of least squares for XPS peak parameters estimation. Part 1. Myths and realities 141
The use of least squares for XPS peak parameters estimation. Part 2. Univariate hypothesis testing 165
The X-ray photoemission spectra of $Nd(OH)_3$, $Sm(OH)_3$, $Eu(OH)_3$ and $Gd(OH)_3$ 1
Theory of many-body effects in valence, core-level and isochromat spectroscopies along the 3d transition metal series of oxides 117
Ultrathin nickel oxide on the V_2O_3/Cu(100) surface studied by XPS 51
XPS studies of V_2O_5, V_6O_{13}, and V_2O_3 249
